

Products & Services

Last Updated Thursday, 28 August 2008

Every year we invest in new diagnostic equipment and our employees and are able to cover the latest and most up to date models. We have a diagnostic bay with a wall-mounted display to allow you, the customer, to view your car's complete information and allow us to talk you through any faults your car may have.

Our team here in Glasgow B4BMW is dedicated, experienced and have received up-to-date training to ensure quality work and exceeded customer satisfaction.

Although we are the leading BMW independent specialist based in Glasgow, Scotland we have a very wide catchment area.

Products

We cover all the standard products and services as you would expect from a garage and specialise in BMW in the Glasgow and Central Belt of Scotland area. If you are unsure if we can help you please give us a call, use our contact form or fill in an online quote form. We will respond quickly to your question.
