

Car Key Centre replaces car keys and transponders

Last Updated Sunday, 28 September 2008

It happens to all of us at some stage in our life, we loose our car keys or we need more copies. Unfortunately replacing your car key, transponder or even your cars' remote is usually quite expensive and difficult to obtain.

These days are now hopefully over as the Car Key Centre provides replacement keys much cheaper and quicker than either the dealer or the manufacturer can supply these.

Please have a look at the car key centre's range of available keys (please call them if you don't see what you need). They supply the keys by mail order, through an online shop and also have a mobile unit that can come to you in the Glasgow area, cut and code a new transponder key for your car.
