

BMW 525D Remap

Contacted B4BMW in Glasgow with the concept of having my BMW 525D remapped. They were very helpful in every aspect and talked me through every detail and changes I would expect in performance of the car. My BMW went from 174hp to 258hp and torque was greatly improved to. I was told the more I drive the car the better the performance would be. But I noticed an impressive change in the car in my first drive. I've also seen an increase in the mpg, but the difference in performance is outstanding now after the car has had time to learn the new settings. I would recommend B4BMW to anyone as the workmanship and the professionalism of the entire staff is second to none, they offered a great service and were very helpful and courteous at all times.
